- Application and Web development as full stack developer.

EDUCATIONAL HISTORY

- Following the BSc. (Hons) in Computing and Information Systems, Department of Computing and Information Systems Sabaragamuwa University of Sri Lanka. 2017 – Present (Undergraduate)
- Followed Diploma in Software Engineering (DISE), ESOF Metro Campus – Matara, 2020 (Pearson assured)
- Followed Diploma in English Language, British Way English Academy, 2017

Tools and Technologies

Office package
Adobe package (Ps, Ai)
Visual studio
Visual studio code
Android Studio
Eclipse
WordPress
Blogger
MYSQL
Mongo DB
FIREBASE
NetBeans
Figma
Google Cloud Platform
AWS/Azure
Jupiter Noteboot
Pycharm
Postman
Git/Bitbucket

Extra-Curricular Activities

- Blog writer of etechcode.blogspot.com
- Member of the Society of Computer Sciences in Sabaragamuwa University of Sri Lanka
- WordPress Web Designer.

- **Puhulwella Central College:**
 - GCE Ordinary Level Examination (2013)
A-2, B-5, C-2;
 - GCE Advanced Level Examination (2016)
C-3;
- **Total immersion Tamil Language Course,**
National Institute of Language Education and Training (NILET),
2017
- **Following "Trainee- Full Stack Developer" programme,**
Center for Open & Distance Learning,
University of Moratuwa.
2022

PROJECTS

- **Event and photograph sharing platform (NUINSTA)-2021/07**
Technologies: - React, Nodejs, MongoDB
Description: - This is like a CRUD application. Users can create profiles, add posts, delete, and update profile details. If the user is interested in knowing more details user can add a comment to that event post.
- **Travelling Agency Customer Payment Management System**
Technologies: - C#, SQL
Description: - This is like a CRUD application. It helps to manage transactions in the trip agency. This has very user-friendly interfaces
- **Create SRS for an external plugin for ERP System (group)**
Technologies: - Figma (for creating prototypes)
Output: - SRS Document
- **Service Providing Web Application (Garage 1) (ongoing)
-2021/09**
Technologies: - PHP, MYSQL
Description: - It will provide vehicle garage details including contact number, and location. As well as it will cover the island and categorize the garages.
- **Vehicle hiring Fee Calculator**
Technologies: - Flutter, Dart
Description: - This is a cross-platform application. It is a very useful tool for drivers to calculate their hire fees. I hope to develop this application for sending text messages as an e-bill.
- **Hotel Menu Card**
Technologies: - PHP, MYSQL
Description: - It will display prices and quantity of foods. As well as users can select foods that they need. It has user-friendly interfaces. As well as users can update the database easily.
- **Tourism industry movement prediction application using twitter data.(ongoing)-2022/02**
Technologies: MACHINE learning, SVM(support vector machine) algorithm, naive bayes algorithm
Description: this development and analysis do under my final year research with using machine learning and data mining techniques by using twitter data. And also this consider sentiment analysis of tweets that related tourism industry.
